Art Unit: 3634

1. Claims 3,4,7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3 and 4 are indefinite for they are drawn to a method of manufacturing whereas the claim upon which they depend is an article claim.

Claim 7 is indefinite for it attempts to set forth that claim 8 is a combination claim, whereas, claim 8 is clearly set forth as being a subcombination claim drawn to a bracket and not to the combination of the bracket with a goods-handling door.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 8,9,7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Cattaneo. Cattaneo discloses a bracket including a face branch 1,3 having fixing holes, and a tab 4,7 having a hole 5.

Art Unit: 3634

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cattaneo. While Cattaneo does not disclose the type of material from which the bracket is constructed from, it is a well settled issue that the selection of a known material based upon its suitability for the intended use would have been obvious to one of ordinary skill in the art.

4. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Whitehouse et al '706, Kraler.

5. Applicant's amendment presenting new claims 8,9 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3634

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
